

## ACIDS - BASES

P. 196 # 69, 70, 72, 77, 78, 80, 81, 82

- |                                                                                                                                                                                                                 |                                                                                                                                                                                                                                        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>69. a. <math>\text{CuCl}_2</math> Soluble<br/>         b. <math>\text{AgNO}_3</math> Soluble<br/>         c. <math>\text{PbCl}_2</math> Insoluble<br/>         d. <math>\text{Cu(OH)}_2</math> Insoluble</p> | <p>70. a. <math>\text{Cr}_2\text{S}_3</math> Insoluble<br/>         b. <math>\text{Ca(OH)}_2</math> Insoluble<br/>         c. <math>\text{BaSO}_4</math> Insoluble<br/>         d. <math>(\text{NH}_4)_2\text{CO}_3</math> Soluble</p> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

72. a. NO RXN

80. a.  $\text{H}_2\text{O}$

b. GAS ( $\text{H}_2\text{O}$ )

c. Precipitate =  $\text{BaSO}_4$

b. NO RXN

82. a. NO RXN
